-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 2, 9-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 2 do not appear possible as written; it appears that the reducing agent of claim 3 is needed. Therefore, incorporation of claim 3 into claim 1 appears necessary.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-17, 22-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over 4060588.

Mandelik teaches, especially in col. 2, 6 and 9, reacting Ca salt with SO₂, treating the Ca sulfate with carbon to make CaS, then reacting it with H₂S and water and then carbonating. This differs from the claims only in not specifying that the H₂S is in aqueous solution, however this is an obvious expedient to efficiently contact the materials which are in solution. As to claim 9, using an excess is an obvious expedient to ensure recover of all the alkaline earth metal. As to claim 14, the teaching of the Claus Process meets it. As to claim 16, reusing the reagents is an obvious expedient for economic efficiency.

The submitted reference to Suriani is of interest.
